From

Arthur Crawford Esquire
Commissioner &c

To

The Secretary to Government

Bombay 5th March 1880

Sir

With reference to Government Resolution no: 908 of 19th February 1874 I have the honor to submit for the consideration and orders of Government a report from the Collector of Dharwar No 3640 of 29th ult. & C. together with two Statements subsequently received showing

the Government lands within
municipal limits of Dharwar
and Hubli and the difference
between the old and
the revised apessments
proposed to be made over to the
municipalities under para 2
of the Resolution.

* Hubli Rs 613-10-
Dharwar Rs 154-14-
Vide col. 10 of the
statement.

2 In para 4 of the
same Resolution it is stated
that before the lands are formally
and finally made over, it will
be advisable to await the
completion of the Survey. As,
however, it will take some
time before the Survey is completed
the Collector proposes to allow
the Municipalities to derive the
benefit of the difference between
the old and the revised Survey
apessments

1907

assessments in consideration of their having spent large sums of money on the city survey work.

3 Since the receipt of Government Resolution No 6710 of 16th December last, the city survey work has been stopped. But the Collector reported in October last that 4,600 houses were measured at Hubli at a cost of Rs 5,758. The work at Dharwar also has progressed to a great extent. It might therefore be considered desirable to complete the city survey work. In the meanwhile, however I recommend that the Municipalities be allowed benefit to the extent mentioned

Rec. 8/31/80 546 B
in the margin of para 1 refer. Rs 768-8-

4 The lands entered
in Col: 6 of Mr. Robertson's statement
and referred to by Mr. Elphinston
being Inam lands, are not
subject to enhanced assessment
and the Judi already fixed on
them will not increase except
in the case of village servants
useful to Government. The
Judi, moreover, is not yet raised.
It is therefore, unnecessary to pass
any orders regarding the Judi
leviable on these lands.

I have the honor to be
Sir
Your most obedient servant
A. W. [illegible]
Commissioner S.D.

No 3690 of 1877.

From

To The Collector of Dharwar

The Commissioner S.D.

Survey Office 29th September 1877.

Sir,

With reference to the
Survey Resolution No 908 dated
the 19th February 1876 (Revenue
Department) approving of the
views of Lt Roberts late Col.
Asst. Supt of Dharwar in the conclu-
sions which Government had
proposed to make to the re-
valuation of Dharwar & Belgaum
in the 5 talukas under forego-
ing Resolution No 4322 dated
29th July 1873 I have the hon-
to direct your notice that the
revised survey rates have al-
ready been introduced in the
Dharwar Taluka in the current
year.

2. For the town limits of
of Hubli the Survey Commissioner

°373/74
Mutn/s.

C 936/73.

Your most obedient servant
(illegible)
Commissioner &c

Dharwar

No. 3690 of 1879.

From

The Collector of Dharwar,

The Commissioner S.D.

Camp Hubli 29th August 1879.

Sir,

With reference to Government Resolution No 908 dated the 9th February 1874 (Revenue Department) appointing a Settlement Officer of the Collectorate late Collectorate of Dharwar for the Government villages which Government are prepared to make to the Inamdar talukas of Dharwar & Kalad in this District under Government Resolution No 4342 dated 29th July 1873 I have the honor to submit herewith that the revised survey rates have already been introduced in the Dharwar & Kalad talukas in the current year.

C 373/74

C 936/73
51-M

2. For the town municipality of Hubli the survey commissioner

has prepared a separate statement showing the land included in the Municipality, but the land has not been valued prior to the commencement of the Municipality owing to the non-completion of the City Survey both of the town & subsequent inquiry into titles. It is the contention of the City Survey people will take a considerable time & do not think it desirable to postpone any longer the grant of the charter. Upon alluded to in Government Resolution No 908 above quoted to the Municipality of Kirkee as it has been contributing largely towards the cost of the Survey work without any return whatever up to this date.

4. According to the provisions contained in para 2 of the Government Resolution No 908 above quoted the Municipality is entitled to the benefits of any enhancement imposed

on the introduction of the [illegible]
water. I therefore request that the
orders of Government which were
obtained as to whether the dif-
ference between the old &
the present water of the land
of the nature described in cl.
3 & 6 of the statement submitted
to you by the Robertsons
with their letter of 28th of
25th November 1873 may not
be handed over to the Muni-
cipality without waiting for
the completion of the [illegible]
-way on which a portion
shall will be given to the
as stated in para 4 of the
resolution. -)

5. As after arrangements
have been there will be no ne-
-cessity to pay any [illegible]
-tation to the village offi-
-cers. They would mean a loss
from the transfer of the wa-
-ter which they [illegible]
will have to collect for

which they will receive remunerations from the Municipality instead of from the Government Treasury.

6. The arrangements above proposed for the Municipality will if approved & authorised be brought into force in the case of the Harveian Municipality also.

7. I beg of the Council to invite your attention to section 32 of the Boundary Revenue Code which requires the holder of each Survey number to pay a fee not exceeding Rs 5 for each number. Under the old City Survey also no such survey fee was leviable for each number & as the taking of the Canal was effected before a separate prospect of any separate revenue to the Municipality in consideration of the loss caused by it. If you consider that I have right

in my deposition that the
Turkey fees are also made
over to the Municipality. I
request that this fact may
be brought to the notice of
Government in the disposal
of the questions of the above
Concessions.-

I have the honor to be
Sir,
Your Excellency's most obedient Servant
J. Applewhaite
Acting Collector.

No 328 of 1880

Survey Commissioner's Office

Poona 10th April 1880

Memorandum

RECD
APR 12
880

1 Assuming that no objection exists to carry out the proposal of making over the land placed within Municipal limits to the Municipality I see no objection to the adoption of the proposal contained in the Collector's 4th Para. and the 2nd Para of the Commissioners Memo.

2 The Dharwar City Survey is as regards field work complete the making up of papers only remain

to be done. The Survey of Hubli is incomplete. Farther proceedings with these Surveys was stopped by Govern-ment Resolution No. 6710 dated 16th December last. That was in connection with a project for a house site tax, and it was I infer the progress of the enquiry rather than the completion of the Survey which it was considered desirable to stop. Whatever may be the case as regards the enquiry there is no visible objection to the completion of the Survey which is as regards Hubli, the more necessary since either from Goa or Karwar a Railway will probably come

C 1066/7

come there at no very distant date.

Letter from the Govt.
S.O. No. 514. dated 5th March 1880
submitting, with
reference to Govt. Resol. No. 908,
dated 19th Feby 1874, a Report from
the Collr. of Dharwar (No. 369 of
1879) together with two statements
showing the Govt. lands within
Municipal limits of Dharwar
& Hubli & the difference between
the old & the revised Assess-
ments proposed to be made
over to the Municipalities under
para 2nd of the above
quoted Resolution. Stating that
as it will take some time
before the Survey of these towns
is completed the Collector proposes
to allow the Municipalities to
derive the benefit of the dif-
ference between the old & the
revised Survey Assessments
in consideration of their having
spent large sums of money
on the city Survey work; &
adding that since the receipt
of Govt. Resol. No. 6710 of 16th Decr
last the City Survey work has
been stopped, but the Collr.
reports in October last
that 4600 houses were measured
at Hubli at a cost of Rs 5-7-5 &
as the work at Dharwar also
has progressed to a great
extent, it might be considered
desirable to complete the City
Survey work; but in the
meanwhile he would recom-
mend that the Municipalities
be allowed the benefit of the
enhancement of the assessts.

Memo from the Survey & Settlt Commr & No 328, dated 15th April 1880

Resol. Govt concur with the Survey Commr in thinking it advisable that the survey of the lands within the municipal limits of Dharwar and Hubli should be completed as soon as possible. The prohibition

the measure, suggested in para. 3 of Govt. Resol. No. 6710 of Dec. 16. 1879 may be withdrawn; Govt reserving to themselves the right to resume the whole or any portion of such lands at any time they may require them for the purposes of the Municipalities, on the Municipalities paying to Govt the value of the lands at the time of resumption, as determined by the Collr. & Survey Commr. (No. 760 of 80)

Para 4 of Resol. No. 908 of 19th Feb. 1874 directing the completion of the Survey, whether assessment from Govt lands within the enhancement of rates may however, after the present arrangement has been made

Govt to be applied to the Municipalities, on the understanding that the Municipalities are not to claim

to be applied to the completion of the Survey, and that no title to the land itself is conferred thereby on the Municipalities. When the Survey operations are finished Govt will resume possession of the lands, retaining such portion of the assessments as may be required to cover the cost of the Survey.

REVENUE DEPARTMENT.

Bombay Castle, 20th April 1880.

Letter from the Commissioner, S D, No 514, dated 5th March 1880—Submitting, with reference to Government Resolution No 908, dated 19th February 1874, a report from the Collector of Dhárwár (No 3690 of 1879), together with two statements showing the Government lands within municipal limits of Dhárwár and Hubli and the difference between the old and the revised assessments proposed to be made over to the municipalities of these towns under paragraph 2 of the above quoted Resolution; stating, that as it will take some time before the survey of these towns is completed, the Collector proposes to allow the Municipalities to derive the benefit of the difference between the old and the revised survey assessments in consideration of them having spent large sums of money on the city survey work, and adding that since the receipt of Government Resolution No 6710 of 16th December last, the city survey work has been stopped, but the Collector reported in October last that 4,600 houses were measured at Hubli at a cost of Rs 5,758 and as the work at Dhárwár also has progressed to a great extent, it might be considered desirable to complete the city survey work, but in the meanwhile, he would recommend that the Municipalities be allowed the benefit of the enhancement of the assessment.

Memorandum from the Survey and Settlement Commissioner, S. D., No. 328, dated 10th April 1880

RESOLUTION.—Government concur with the Survey Commissioner, in thinking it advisable that the survey of the lands within the municipal limits of Dhárwar and Hubli should be completed as soon as possible. The prohibition, therefore expressed in paragraph 3 of Government Resolution No. 6710 of December 16th, 1879, may be considered to apply to the work of enquiry into titles only. As regards the land the settlement of which has been already revised, Government are not at present prepared to transfer it entirely to the Municipalities, such transfer moreover being, under paragraph 4 of Resolution No 908, dated 19th February 1874, contingent on the completion of the survey. The excess revenue from Government lands arising from the enhancement of rates may, however, after the ~~present~~ assessment has been made good to Government, be credited to the Municipalities, on the understanding that the whole amount (Rs 768-8-0) is to be applied to the completion of the survey, and that no title to the land itself is conferred hereby on the Municipalities. When the actual survey operations are finished Government will be in a better position to issue final orders. Regarding the alienated land nothing need at present be done.

Acting Secretary to Government.

From

Colonel W. C. Anderson
Survey & Settlement Commissioner S.D.

To

The Secretary to Government
Revenue Department
Survey Commissioner's Office
Poona 3rd August 1880.

Sir,

Under Section II Clause 1 of Bombay Act I of 1875 it was necessary that the date fixed by Government for receiving resignations of land in the year of the introduction of settlements should not be later than the 5th June. This Act is abrogated by Section 2 of the Revenue Code in which no similar provision

is made. But Section 74 of the Revenue Code provides that resignations of land may be received before any date which may be from time to time prescribed by Government, Section 104 of the Revenue Code providing that in case of any holder of land resigning his land before the 31st March of the year next following that in which the new rates may be introduced the old rates of assessment alone shall be collected for that year. A landholder can therefore keep his land on the old rates for the year following the introduction of the Settlement or he may resign it at once, in doing which Government would

not wish to throw any obstacles in his way in this particular year.

2nd I beg therefore that the date of June 20 may be sanctioned for the reception of resignations in the Talukas of Kanara, Dhárwar Belgaum and Kaladgi Collectorates in which revised settlements were introduced in the past season, to take effect in 1880/1. Some few of these settlements were unavoidably introduced very late in May or in the beginning of June. In the case of some of these settlements the date of the 5th June was mentioned in the sanctioning Government Resolution as that up to which applications for resignation

Recd 6/8 2005B

might be received, in other Resolutions sanctioning settlements no date was fixed.

3rd In real fact the number of resignations affected by the order now asked for will be almost — nominal, what very few resignations occurred were as a rule given in at the time of the giving out of the rates, but it was necessary to name a date up to which any other resignations desired to be sent in might be received, which date was fixed at June 20 to which by law the sanction of Government is necessary.

Your obedient servant,

Alfred Mg

From

The Collector of Kanara

To,

The Commissioner

Southern Division

Camp Goa 11th May 1880

Sir

I have the honour to submit for the sanction of Government a Letter with accompaniments from the Survey Commissioner, S.D. forwarding proposals for the introduction of the Survey Settlement into (17) Seventeen villages of the Supa Peta division of the Supa Taluka

2 As stated by Colonel Anderson the last Settlement made in this part of the Country was in 1872, and I can entirely concur his remark that this Settlement has in every way proved satisfactory. The rates were moderate, and did not press hardly on the poorer occupants of the land. This fact increases the regret that the work had

has been considerably retarded by causes which the Survey Commissioner has described. As to healthiness of this part of the country has of late improved, if this state of things lasts I hope that the measurers and Classers may be able to work longer with less risk to their health

3. The area of the Supa Peta is large, and very much of it is Covered with thick forest, both deciduous and evergreen, some of it being far superior to any other forest land in Kanara The whole country is undulating and is intersected by the Kala-nadi and its affluents The Ghats form its western boundary, where it marches with the Goa Territory from the hill of Dar Sing, on the Summit of which the three Districts of Belgaum, Goa, and Kanara meet, to the limits of the Karwar Taluka, at a point about 10 Miles north from the Anshi Ghat.

4. The communications throughout

the

the Peta include the Moorummed road from Belgaum via the Anshi Ghat to Kadra, in the Kanara at the head of Navigation on the Kalnadi Branch road runs from Jaggalbet to the head of the Tinai Ghat, meeting there three roads one leading down the Ghat into Goa Territory, a second to Belgaum, and the third to Dhárwar This line is also connected with the forest road from Supa to Nabigal These roads are unbridged and therefore all traffic ceases during the rains. There are three small roads branching off to the Ghats, to points on the Goa Frontier, at Coosde, Kundal and Dokarpa. Next to the Tinai Ghat, the Digge Ghat has most traffic, but there is a mere track leading to it. There are also two or three small roads opened up by the Local Funds.

5 From the above it will be seen that the communications in this part of the country are inefficient;

the

the Local Funds are small and are unable to provide even for the maintenance of existing small roads Dharamdas Vga and for the provision of a good water supply, which is much required in this District I strongly recommend the improvement of the Diggi Kiat track and the bridging of the main line through the Peta, whenever Provincial Funds can be obtained.

6. The cultivated area is small in the Supa Peta and is held by the Shenvi Brahmins and Mahrattas The latter include some families of Desais, and also the Kunbi Cultivators who live near the Ghats Kunbi Cultivation has been much curtailed of late years, but it cannot be wholly done away with at present without causing great hardship, and driving a large number of people from British into Goa Territory. In Communication with the Conservator, and with the aid of his Department, the arrangements for

for allotting plots of land for
Kumri have been much improved,
and Colonel Peyton, and I are
sanguine that we shall soon be
able to regulate the cultivation
in a manner which we hope
will be satisfactory to Government
and sufficiently liberal to the
people

7 The principal Crop Cultivated
in the villages now reported on is
Rice, Sugar Cane is sparsely raised,
and the garden area, on which
Cocoanuts, Areca nuts & Tea are grown
is very limited. The Rice Crop is
grown both during the monsoon
and during the Cold season, the
harvest of the former is in November
and December, and of the latter in
May, immediately before the monsoon
Last year a large portion of the latter
Crop was lost owing to the early
rains, which Commenced about
the 20th May, a date which as
far as I can learn, was earlier

than

than has been known for many years. But little of the rice land in this part of the Country bears a second Crop.

8. I entirely Concur with the Survey Commissioners as to the rates of assessment proposed, and also regarding the grouping of the villages. As he states, it is impossible to make any accurate Comparison in these villages between the past assessment and that now proposed. Hitherto one village has included any number of hamlets scattered at widely intervening distances all over the Country, some portions of them being entirely isolated from the rest. The old accounts give the Warg number of the occupant, in which may be included patches of land in different hamlets, and the exact assessment on each patch is unknown. In the absence of a Survey, it was impossible to know the exact position of the whole.

whole of the land within a Warg and held by one occupant. Most of the hamlets Consist of one house with its adjoining buildings, in very rare Cases does the name of the village indicate more than a certain area of Country, the Central spot being generally the Site of the Grâm Dewastan, or the Chief temple of this portion of the Country

9. The rates proposed now being very moderate, if hereafter on the whole we find a Considerable increase in the Revenue Collections, we must accept it as a sure proof that much of the Cultivated area has hitherto been unassessed, or has borne a very light assessment. In the four villages named by the Survey Commissioner where the entire area is said to be now included in these proposals, the new assessment is higher than the old rates, but I Concur with

Colonel

than has been known for many years. But little of the rice land in this part of the Country bears a second Crop.

8. I entirely Concur with the Survey Commissioner as to the ratio of assessment proposed, and also regarding the grouping of the villages. As he states, it is impossible to make any accurate Comparison in these villages between the past assessment and that now proposed. Hitherto one village has included any number of hamlets scattered at widely intervening distances all over the Country, some portions of them being entirely isolated from the rest. The old accounts give the Warg number of the occupant, in which may be included patches of land in different hamlets, and the exact assessment on each patch is unknown. In the absence of a Survey, it was impossible to know the exact position of the whole.

whole of the land within a Warg and held by one occupant. Most of the hamlets Consist of one house with its adjoining buildings, in very rare Cases does the name of the village indicate more than a certain area of Country, the Central spot being generally the Site of the Grām Dewastan, or the chief temple of this portion of the Country

9. The rates proposed now being very moderate, if hereafter on the whole we find a Considerable increase in the revenue Collections, we must accept it as a sure proof that much of the Cultivated area has hitherto been unassessed or has borne a very light assessment. In the four villages named by the Survey Commissioner, where the entire area is said to be now included in these proposals, the new assessment is higher than the old rates, but I Concur with

Colonel

Colonel Anderson that it is quite possible that as the Survey progresses fresh plots of Cultivated land may come to light in other hamlets, the old assessment of which is included in that now assigned to these village lands.

10. In conclusion I have the honour to state my entire Concurrence with the Survey Commissioner's proposals, and to recommend them for the early sanction of Government. I believe that the arrangements which I have made will enable us to introduce the Settlement into these villages during the current month. Should other adjoining villages be Ken ready for Settlement, I would ask that Government may allow its introduction at the same time in anticipation of Sanction, as the Rates will be Similar and their position and Circumstances exactly

Correspond.

Correspond to those of the villages now under report. I agree with Colonel Anderson, that the smallest progress in the Survey Settlement in the Supa Taluka is better than none at all, and that Considering the Character of the Country with which we are dealing, the slow progress made is fully accounted for, though we may hope that with an improvement in the Climate, the future progress of the Survey Settlement may be somewhat accelarated.

11 I may add that the Concessions under Government Resolution No. 5573 dated 21st October 1874, will so far as they are applicable, be brought into effect in the present Settlement.

12 It may also be of interest to note that Mr Sawyer the Chief Engineer in Charge of the Survey of the proposed line

Railway
line from Murmagao on the
Coast in the Goa Territory, to
Hubli in the Dharwar District
informs me that he has found
a good line for the Railway over
the Ghats, at a point between
Jmar and Caessi, both which
places are shewn on the Map
accompanying the Survey Commissioner's
Report. The line will run for
some distance very close to
the main road leading to Dharwar.

13. To a certain extent
this line of Railway will be
of importance to the northern
portion of the Supa Taluka. But
to the rest of the Kanara District
it will be of no use, on the
contrary it will draw away
the traffic now passing through
Kanara to the British ports
of Karwar and Koompta, to
the foreign port of Murmagao.
I much regret that this new
Scheme seems to have superseded

the

the line of railway to Kanwar, —
which was formerly much approved
and which would have been
of infinite value to British
Territory.

I have the honour to be,
Sir,
Your most obedient Servant.

W. Edwards
Collector of Kanara.

No. 451 of 1880

From

Colonel W. C. Anderson

Survey & Settlement Commissioner

To

The Collector of Kanara

Survey Commissioner's Office

Karwar 8th May 1880

Sir,

I have the honor to request sanction for the introduction of the Survey Settlement into (17) seventeen villages and hamlets of the Soopa Mahalkiaris Division. I have delayed thus late in asking for sanction in the hope of receiving the papers of more villages classed in the current field season; but to-

the accidents common to the progress of work in Kanara, men falling sick &c., have prevented more villages being ready for report. At the same time I am averse from placing this much progress in abeyance as there is really no revenue system whatever now existent in these villages as will be evident from the fact that I am unable as regards the greater number of them to state what the present revenue collections mount to.

2nd The circumstances of the Coorg Subdivision was generally reported on by my No. 154 of the

3d February 1872, reporting upon the rates of assessment for 62 villages and hamlets. The 17 villages for the settlement of which I now ask sanction are adjacent to and intermixed with those villages and similar rates of assessment to those sanctioned for them, which have I understand proved in every point appropriate, are now proposed for these 17 villages which are placed in three groups similarly to the 62 villages previously settled.

1st Comprising (1) one village somewhat inland from the Ghats —

maximum rice land rate Rs 4—8

maximum dry land rate Rs 0—12.

the accidents common to the progress of work in Kanara, men falling sick &c., have prevented more villages being ready for report. At the same time I am averse from placing this much progress in abeyance as there is really no revenue system whatever now existent in these villages as will be evident from the fact that I am unable as regards the greater number of them to state what the present revenue collections amount to.

2nd The circumstances of the Soopa Subdivision was generally reported on by my No. 154 of the

3rd February 1872, reporting upon the rates of assessment for 62 villages and hamlets. The 17 villages for the settlement of which I now ask sanction are adjacent to and interminged with those villages and similar rates of assessment to those sanctioned for them, which have I understand proved in every point appropriate, are now proposed for these 17 villages which are placed in three groups similarly to the 62 villages previously settled.

1st Comprising (1) one village some what inland from the Ghats —

maximum rice land rate Rs 4—8

maximum dry land rate Rs 0—12.

2nd Comprising 13 villages. Rice rate the same as the 1st group but the dry crop rate is reduced to Rs. 0 -10 these villages are nearer to the Ghats than the 1st group and therefore less suitable for dry crop cultivation.

3rd Comprising 3 villages on, or in immediate vicinity of, the Ghats Rice maximum rate Rs. 4-0 dry crop Rs. 0-8.

3rd The appended map shows all the villages referred to; those for settlement now being colored with the color of their class and underlined with red.

4th ... For the garden lands which only comprise Acres 22 I propose a maximum rate of Rs. 8.

as for the villages previously settled. These lands are of very inferior quality to the general run of garden lands in Kanara to the Southward. Cocoa-nut and Supari trees are here and there grown, but as a rule they are but sparsely planted, spices so commonly grown farther to the South are not grown here, plantains appear to be the best kind of garden crop grown with the cocoanut and supari trees. The average rate on this garden land amounts to only Rupees 3 – 2 – 11.

5th. The result of the imposition of the above rates on these villages is shown in the following statement

No. of village	By old Accounts occupied land		By Survey Accounts Government occupied land		Government arable unoccupied waste		Total Government land	
	Acres	Assessment	Acres	Assessment	Acres	Assessment	Acres	Assessment
17	"	"	1988	3645	316	136	2304	3781

6th. The following is the Survey area and assessment of the occupied land in detail.

	Acres	Assessment Rs.	Average rate per acre Rs. As. Ps.
Garden land	22	70	3 2 11
Rice land	1565	3466	2 3 5
Dry crop land	401	109	0 4 4
Total	1988	3645	1 13 4

But it is impossible to draw any

comparison between the revenue to be produced by these rates and the past collections since so far as we know four only of these villages are entire villages. The other 13 are parts of villages, the remaining parts being as yet unsurveyed, and till the Survey of them is made are of unknown area and situation. In all parts of Kanara this custom of one village or unit for revenue management consisting of several detached portions is common, but in this forest tract it is more common than elsewhere and more irregular since the hamlet may be 8 or 10 miles or more from the

parent village and quite detached from it the revenue is shown in the lump on the whole village and the very "Wurgs" or "Khateks", or accounts of different ryots, may comprise lands in the parent village and in hamlets. The Shanbog is sure to be a considerable landholder and to hold in the parent village and in most if not all the hamlets, often under the asserted entry of one "Wurg" or "Khatek" which is gifted with an undefinable extent of elasticity of comprehension.

7th As regards four villages we are told that we have the entire lands before us and the result of the Survey rates

rates in these villages is as follows.

Village	Occupied land Old collections Rupees	Survey assessment Rupees	Increase per cent
1 Badgoond	70	104	48·6
2 Soopa	30	51	70·
3 Koovashee	170	246	44·5
4 Awdeh Khopulwadee	132	145	10·
Total	402	545	25·8

8th But we have no certainty whatever that we are not misinformed as to the lands now surveyed and stated to comprise the whole village really doing so. It is quite possible that as the Survey progresses some miles off a plot of cultivation and a small hamlet in some secluded valley will be found and will be at

parent village and quite detached from it, the resume is shown in the lump on the whole village and the very "Wargs" or "Khatehs", or accounts of different ryots, may comprise lands in the parent village and in hamlets. The Shanbog is sure to be a considerable landholder and to hold in the parent village and in most if not all the hamlets, of land under the asserted entry of one "Warg" or "Khateh" which is gifted with an undefinable extent of elasticity of comprehension.

7th As regards four villages we are told that we have the entire lands before us and the result of the Survey

rates

rates in these villages is as follows.

Village	Occupied land		
	Old collections Rupees	Survey assessment Rupees	Increase per cent
1 Badgoond	70	104	48·6
2 Soopa	30	51	70·
3 Hoovershee	170	246	44·8
4 Awadh Phopulwadee	132	145	10·
Total	402	545	25·8

8th. But we have no certainty whatever that we are not misinformed as to the lands now surveyed and stated to comprise the whole village really doing so. It is quite possible that as the Survey progresses some miles off a plot of cultivation and a small hamlet in some secluded valley will be found and will be at-

at once asserted to be a portion of some "Kurg" in one of the above named villages.

9th " The total new assessment under the proposed rates on the Government occupied land of these 17 villages is Rs. 3645 which will probably add from 25 to 50 per cent to the present revenue when we are able to ascertain what that is.

10th " The following is the total area and assessment of these villages under every head.

	Acres	Assessment Rs.
Government occupied land	1988	3645
Government unoccupied assessed waste	316	136
Inam	"	"
Government unarable unassessed waste, mostly forest	28386	"
Total	30,690	3,781

11th. The statistical papers of these villages are only partially made up yet on account of the leeway of the classification the population in the 62 villages settled in 1872 was in consequence of the large area of forest only 21 to the square mile and it is not probable that this rate will be exceeded in the villages now under report.

12th. It is possible that the classification papers of some more villages may be ready in the course of the next few days into which it might be possible to introduce the Survey rates.

13th. I have sent up the proposal

for the settlement of these few villages believing that you will concur with me in considering that any progress possible in the Survey Settlement of this Taluka should bee secured. I am however not quite certain of the Mamlatdar's preparations for the settlement will be complete in time. But as without sanction we can make no settlement, I have thought it advisable to apply for sanction in case other circumstances should render the settlement possible.

4th The Mamlatdar's Division of this Taluka was completely settled some years back, the progress of the Settlement of the Mahalkaree Subdivision

as been in abeyance for some years

There was for some time a difficulty here in carrying on the measurement in consequence of very sickly seasons, and under those circumstances, it was thought better to employ the measurers in this District in very limited numbers and only during the safest period of the year, which does not much exceed about two months. Last year and during the present season better progress has been made as the country near the Ghats is decidedly healthier than that farther inland.

15th I shall be obliged by these papers receiving early consideration.

Your obedient servant,

H Wilson

Survey & Settlement Commissioner

for the settlement of these few villages believing that you will concur with me in considering that any progress possible in the Survey Settlement of this Taluka should be secured. Memo: from the Journ. dd., 20 1004, dated 17 May 1880. submitting circumstances stating the navigation, and the object of the withdrawal of the survey, & requesting him to 17 Wagon & Canoe to go up the Rio Mulatto's Junction of the Panama. Instruct.

Letter from the Secretary of Legation dated 20 May 1880 in reply

[illegible]

Here.

The present report from the Survey Commr contains proposals for the settlement of 17 villages of the Soopa Mahalkari & division in the Kanara Collectorate, in which 52 villages were settled under Govt Sanction conveyed in G. R. no 1204 of 14th March 1872. The Collector reports that the rates then sanctioned have been found to be in all respects suitable.

2/ The principal crop cultivated in the tract under report is rice, there is but a small area of garden land, amounting indeed only to 12 acres, while the land cultivated with dry crops measures 401 acres. The rates proposed are as under

Sorp.	no. of villages	Maximum Rice rate	Maximum Dry crop Rate
1	1	4-8-0	0-12-0
2	13	4-8-0	0-10-0
3	3	4-0-0	0-8-0

the maximum rate on garden land is Rs. 8, which gives an average rate of Rs. 3-2-11. The rates proposed for Rice garden land are similar

Memo: from the Comr. Ld. No 1004, dated 17th May 1880. submitting correspondence noted in the margin, on the subject of the introduction of the survey & settlement into 17 villages & hamlets of the Supa Mahalkaris' Division of the Kanara District.

Letter from the Collector of Kanara No. 1/20 dated 11th May 1880, with accompts.

Submitted to the Hon. the Advocate General

As every day's delay is of importance, seeing that these rates must be sanctioned & at all events the June Kist taken the responsibility of submitting them direct. For the same reason he has drafted the letters which it would take him at least a day to prepare. If the rates are sanctioned Mr. Rogers return he can sign the letters later.

for Kanara 13 volumes some day this week

Letter from the Collector of Kanara dated 23rd May 1880

to three ~~villages~~ sanctioned in
the G. R. noted in the last para;
the dry crop rate proposed for the
one village of the 1st group is however,
2 annas higher than the highest
maximum dry crop rate therein
sanctioned. The Collector fully ad-
-mits both of the prosperity of
the villages & the latter increased,
was the latter seem to bear pres-
-ent moderate they are sanctioned for
a period which should be stated
Rest. Orders in a further report.
It is desirable that the period
of guarantee should expire at the
same time as that granted in
other villages of the same talukas.

The sanction conveyed is fully set to the concessions named in G. R. no 5573 of 11th Oct 1874

3) The Survey Commr. & Collector
both point out that it is im-
-possible to frame such any compa-
-rison between the revenue which
will be realised under the new
rates & that which has hitherto
been collected nominally ~~on~~ the same land.
It is not yet known whether the
whole area of the 17 villages now
proposed for settlement has come
under the Survey measurement
or not. The term village, as expressing
a territorial unit, seems evidently
to be misapplied in this part of

the district. A village so-called is said to consist of numerous detached portions of land situated often at great distances from each other, and Col. Anderson remarks that "it is "quite possible that on the Survey "progressing some miles of a plot "of cultivation or a single hamlet "in some secluded valley may "be found which will be asserted to belong to one of the villages now being settled. In the old accounts the assessment paid on each "warg" or "Kheira" was all that was known, and whether the whole extent of each "warg" belonging to the 17 villages now being settled has been included or not cannot at present be known with any accuracy.

4) Sir H. C. Gale concurs with the Collector that the "smallest "portions in the Survey Settlement "of the Taluka Calendar is better than "none at all", and the latter now proposed to settle with any other that may be found in other villages ready for settlement in the same district before the end of the year have already been sanctioned by telegraph. Govt. are well aware that there are peculiar difficulties in the

work of the Survey in the Kamara
collectorate; and the progress that
has been made this year is
very creditable to the officers con-
cerned.

owing to the conformation of the
country & the unhealthiness of
the climate

Revenue Survey and Assessment.

No. 2910

REVENUE DEPARTMENT.

Bombay Castle, 3rd June 1880.

Memorandum from the Commissioner, S. D., No 1004, dated 17th May 1880—Submitting correspondence noted in the margin, on the subject of the introduction of the survey settlement into 17 villages and hamlets of the Supa Mahálkari's Division of the Kánara District.

Letter from the Collector of Kánara, No. 9-20, dated 11th May 1880, with accompaniments.

RESOLUTION.—The present report from the Survey Commissioner contains proposals for the settlement of 17 villages of Supa Mahálkari's Division in the Kánara Collectorate, in which 4 villages were settled under Government sanction conveyed in Government Resolution No. 1204 of 14th March 1872. The Collector reports that the rates then imposed have been found to be in all respects suitable.

2 The principal crop cultivated in the tract under report is rice. There is but a small area of garden land, amounting indeed only to 22 acres, while the land cultivated with dry crops measures 401 acres. The rates proposed are as under:—

Group.	No of Villages	Maximum Rice Rate.	Maximum Dry crop Rate.
		Rs a p.	Rs. a p.
1	1	4 8 0	0 12 0
2	13	4 8 0	0 10 0
3	3	4 0 0	0 8 0

The maximum rate on garden land is Rs. 8, which gives an average rate of Rs 3-2-11. The rates proposed for rice and garden land are similar to those sanctioned in the Government Resolution quoted in the last paragraph; ~~the dry-crop rate proposed for the one village of the first group is, however, two annas higher than the highest maximum dry-crop rate therein sanctioned.~~ The Collector fully approves both of the grouping of the villages and the rates imposed, and as the latter seem to Government just and moderate they are sanctioned for a period which should be stated by Colonel Anderson in a further report. It is desirable that the period of guarantee should expire at the same time as that granted in other villages of the same táluka. The sanction conveyed is subject to the concessions named in Government Resolution No. 5573 of 21st October 1874

3. The Survey Commissioner and Collector both point out that it is impossible to furnish any comparison between the revenue which will be realized under the new rates and that which has hitherto been collected over nominally the same tract. It is not yet known whether the whole area of the 17 villages now proposed for settlement has come under the survey measurement or not. The term village as expressing a territorial unit, seems indeed to be misapplied in this part of the district. A village so called is said to consist of numerous detached portions of land situated often at great distances from each other, and Colonel Anderson remarks that "it is quite possible that as the survey progresses some miles off a plot of cultivation and a small hamlet in some secluded

valley may be found which will be asserted to belong to one of the villages now being settled. In the old accounts the assessment paid on each "Warg" or "Khata" was all that was known, and whether the whole extent of each "Warg" belonging to the 17 villages now being settled has been included or not, cannot at present be known with any accuracy.

4. His Excellency in Council quite concurs with the Collector that the "smallest progress in the survey settlement of the Supa Táluka is better than none at all," and the rates now proposed, together with any others that may be imposed in other villages ready for settlement in the same district before the end of the year, have therefore already been sanctioned by telegraph. Government are well aware that there are peculiar difficulties in the way of the survey in the Kánara Collectorate owing to the conformation of country and the unhealthiness of the climate, and the progress that has been made there this year is very creditable to the officers concerned.

No. 42 of 1880.

Revenue Department.

Bombay Castle, 7th August 1880.

To

THE UNDER SECRETARY OF STATE FOR INDIA,

LONDON.

MY LORD MARQUIS,

I am directed to forward, for submission to Her Majesty's Secretary of State for India, the accompanying copy of correspondence* as per margin, relative to the Survey Settlement of 17 villages and hamlets of the Supa Mahálkari's Division of the Kánara Collectorate.

Memorandum from the Commissioner, S. D., No. 1004, dated 17th May 1880, with accompaniments.
Government Resolution No. 2910, dated 5th June 1880.

*on No. 1,

I have the honour to be,

My Lord Marquis,

Your Lordship's most obedient Servant,

for Acting Secretary to Government.

No. 451 of 1880.

From

Colonel W. C. ANDERSON,
Survey and Settlement Commissioner, S. D ;

To

The COLLECTOR of KANARA.

Survey Commissioner's Office,
Kárwár, 8th May 1880.

Sir,

I have the honour to request sanction for the introduction of the Survey Settlement into (17) seventeen villages and hamlets of the Supa Mahálkari's Division. I have delayed thus late in asking for sanction in the hope of receiving the papers of more villages classed in the current field season, but the accidents common to the progress of work in Kánara, men falling sick, &c., have prevented more villages being ready for report. At the same time I am averse from placing this much progress in abeyance, as there is really no revenue system whatever now existent in these villages, as will be evident from the fact that I am unable, as regards the greater number of them, to state what the present revenue collections amount to.

2. The circumstances of the Supa sub-division was generally reported on by my letter No. 154 of the 3rd February 1872, reporting upon the rates of assessment for 62 villages and hamlets. The 17 villages, for the settlement of which I now ask sanction, are adjacent to, and intermixed with, those villages, and similar rates of assessment to those sanctioned for them, which have, I understand, proved in every point appropriate, are now proposed for these 17 villages, which are placed in three groups similarly to the 62 villages previously settled—

1. Comprising (1) one village somewhat inland from the Ghâts, maximum rice land rate Rs. 4-8-0, maximum dry land rate Rs. 0-12-0.

2. Comprising 13 villages. Rice rate the same as the 1st group, but the dry crop rate is reduced to Rs. 0-10-0 ; these villages are nearer to the Ghats than the 1st group, and therefore less suitable for dry crop cultivation.

3. Comprising 3 villages on or in immediate vicinity of the Ghâts. Rice maximum rate Rs. 4-0-0, dry crop Rs. 0-8 0.

3 The appended map shows all the villages referred to, those for settlement now being colored with the color of their class and underlined with red.

4. For the garden lands, which only comprise acres 22, I propose a maximum rate of Rs. 8 as for the villages previously settled. These lands are of very inferior quality to the general run of garden lands in Kánara to the southward. Cocoanut and supári trees are here and there grown, but, as a rule, they are but sparsely planted ; spices so commonly grown farther to the south are not grown here , plantains appear to be the best kind of garden crop grown with the cocoanut and supári trees. The average rate on this garden land amounts to only Rs. 3-2-11.

5. The result of the imposition of the above rates on these villages is shown in the following statement :—

No of Villages	By old Accounts occupied land		By Survey Accounts.					
			Occupied land		Government arable unoccupied waste		Total Government land.	
	Acres	Assessment	Acres.	Assessment	Acres.	Assessment	Acres.	Assessment.
17	..		1,988	3,645	316	136	2,304	3,781

No. 451 of 1880.

From

Colonel W. C. ANDERSON,
Survey and Settlement Commissioner, S. D.;

To

The COLLECTOR of KA'NARA.

Survey Commissioner's Office
Kárwár, 8th May 1880.

Sir,

I have the honour to request sanction for the introduction of the Survey Settlement into (17) seventeen villages and hamlets of the Supa Mahálkari's Division. I have delayed thus late in asking for sanction in the hope of receiving the papers of more villages classed in the current field season, but the accidents common to the progress of work in Kánara, men falling sick, &c., have prevented more villages being ready for report. At the same time I am averse from placing this much progress in abeyance, as there is really no revenue system whatever now existent in these villages, as will be evident from the fact that I am unable, as regards the greater number of them, to state what the present revenue collections amount to.

2. The circumstances of the Supa sub-division was generally reported on by my letter No. 154 of the 3rd February 1872, reporting upon the rates of assessment for 62 villages and hamlets. The 17 villages, for the settlement of which I now ask sanction, are adjacent to, and intermixed with, those villages, and similar rates of assessment to those sanctioned for them, which have, I understand, proved in every point appropriate, are now proposed for these 17 villages, which are placed in three groups similarly to the 62 villages previously settled—

1. Comprising (1) one village somewhat inland from the Ghâts, maximum rice land rate Rs. 4-8-0, maximum dry land rate Rs. 0-12-0.

2. Comprising 13 villages. Rice rate the same as the 1st group, but the dry crop rate is reduced to Rs. 0-10-0; these villages are nearer to the Ghâts than the 1st group, and therefore less suitable for dry crop cultivation.

3. Comprising 3 villages on or in immediate vicinity of the Ghâts. Rice maximum rate Rs. 4-0-0, dry crop Rs. 0-8-0.

3. The appended map shows all the villages referred to, those for settlement now being colored with the color of their class and underlined with red.

4. For the garden lands, which only comprise acres 22, I propose a maximum rate of Rs. 8 as for the villages previously settled. These lands are of very interior quality to the general run of garden lands in Kánara to the southward. Cocoanut and supári trees are here and there grown, but, as a rule, they are but sparsely planted; spices so commonly grown farther to the south are not grown here, plantains appear to be the best kind of garden crop grown with the cocoanut and supári trees. The average rate on this garden land amounts to only Rs. 3-2-11.

5 The result of the imposition of the above rates on these villages is shown in the following statement:—

No. of Villages	By old Accounts occupied land		By Survey Accounts.					
			Occupied land		Government arable unoccupied waste		Total Government land	
	Acres.	Assessment	Acres.	Assessment.	Acres.	Assessment.	Acres.	Assessment.
17	.		1,988	3,645	316	136	2,304	3,781

6. The following is the survey area and assessment of the occupied land in detail:—

	Acres.	Assessment	Average Rate per acre.
			Rs. a. p.
Garden land	22	70	3 2 11
Rice land	1,565	3,466	2 3 5
Dry Crop land...	401	109	0 4 4
Total .	1,988	3,645	1 13 1

But it is impossible to draw any comparison between the revenue to be produced by these rates and the past collections, since so far as we know four only of these villages are entire villages. The other 13 are parts of villages, the remaining parts being as yet unsurveyed, and till the survey of them is made, are of unknown area and situation. In all parts of Kánara this custom of one village or unit for revenue management consisting of several detached portions is common, but in this forest tract it is more common than elsewhere and more irregular, since the hamlet may be 8 or 10 miles or more from the parent village and quite detached from it, the revenue is shown in the lump on the whole village and the very "Vargs" or "Khatchs" or accounts of different ryots, may comprise lands in the parent village and in hamlets. The Shanbog is sure to be a considerable land-holder and to hold in the parent village, and in most, if not all, the hamlets often under the asserted entry of one "Varg" or "Khateh" which is gifted with an undefinable extent of elasticity of comprehension.

7. As regards four villages we are told that we have the entire lands before us, and the result of the survey rates in these villages is as follows:—

Village	Occupied Land		
	Old Collections	Survey Assessment	Increase per cent
	Rs.	Rs.	
1. Badgnad	70	104	48 6
2. Supa	39	51	70
3. Kuveshi	170	246	44 7
4 Awedeh Phopulwadi	132	145	10
Total ...	402	546	35 8

8. But we have no certainty whatever that we are not misinformed as to the lands now surveyed and stated to comprise the whole village really doing so. It is quite possible that as the survey progresses some miles off a plot of cultivation, and a small hamlet in some secluded valley will be found and will be at once asserted to be a portion of some Varg in one of the above-named villages.

9. The total new assessment under the proposed rates on the Government occupied land of these 17 villages is Rs. 3,645, which will probably add from 25 to 50 per cent. to the present revenue when we are able to ascertain what that is.

10. The following is the total area and assessment of these villages under every head:—

	Acres.	Assessment.
Government occupied land	1,988	3,645
Government unoccupied assessed waste	316	136
Inám land	.....	.....
Government unarable unassessed waste, mostly forest ...	28,386	.....
Total ...	30,690	3,781

11. The statistical papers of these villages are only partially made up, yet on account of the recency of the classification, the population in the 62 villages settled in 1872 was in consequence of the large area of forest only 21 to the square mile, and it is not probable that this rate will be exceeded in the villages now under report.

12. It is possible that the classification papers of some more villages may be ready in the course of the next few days, into which it might be possible to introduce the survey rates.

13. I have sent up the proposals for the settlement of these few villages, believing that you will concur with me in considering that any progress possible in the survey settlement of this táluka should be secured. I am, however, not quite certain if the Mámlatdár's preparations for the settlement will be complete in time. But as without sanction we can make no settlement, I have thought it advisable to apply for sanction in case other circumstances should render the settlement possible.

14. The Mámlatdár's division of this táluka was completely settled some years back, the progress of the settlement of the Mahálkari's sub-division has been in abeyance for some years. There was for some time a difficulty here in carrying on the measurement in consequence of very sickly seasons, and under those circumstances it was thought better to employ the measurers in this district in very limited numbers, and only during the safest period of the year, which does not much exceed about two months. Last year and during the present season, better progress has been made, as the country near the Ghats is decidedly healthier than that farther inland.

15. I shall be obliged by these papers receiving early consideration.

Your obedient Servant,

(Signed) W. C. ANDERSON,
Survey and Settlement Commissioner, S. I

No. $\frac{6}{25}$ of 1880.

From

The COLLECTOR of KA'NARA;

To

The COMMISSIONER, SOUTHERN DIVISION.

Camp Goa, 11th May 1880.

Sir,

I have the honour to submit, for the sanction of Government, a letter, with accompaniments, from the Survey Commissioner, S. D., forwarding proposals for the introduction of the Survey Settlement into (17) seventeen villages of the Supa Peta Division of the Supa Táluka.

2. As stated by Colonel Anderson, the last settlement made in this part of the country was in 1872, and I can entirely confirm his remark that this settlement has, in every way, proved satisfactory. The rates were moderate, and did not press hardly on the poorer occupants of the land. This fact increases the regret that the work has been considerably retarded by causes which the Survey Commissioner has described. As the healthiness of this part of the country has of late improved, if this state of things lasts, I hope that the measurers and classers may be able to work longer with less risk to their health.

3. The area of the Supa Peta is large, and very much of it is covered with thick forest, both deciduous and ever green, some of it being far superior to any other forest land in Kánara. The whole country is undulating, and is intersected by the Kalanadi and its affluents. The Ghâts form its western boundary, where it marches with the Goa territory from the hill of Dar Sing, on the summit of which the three Districts of Belgaum, Goa and Kánara meet, to the limits of the Kárwár Táluka, at a point about 10 miles north from the Anshi Ghât.

4. The communications throughout the Peta include the murumed road from Belgaum *vid* the Anshi Ghât to Kadra in the Konkan, at the head of navigation on the Kalanadi. A branch road runs from Jaggalbet to the head of the Tenai Ghât, meeting there three roads, one leading down the Ghât into Goa territory, a second to Belgaum, and the third to Dhárwár. This line is also connected with the forest road from Supa to Haliyál. These roads are unbridged, and, therefore, all traffic ceases during the rains. There are three small roads branching off to the Ghâts, to points on the Goa frontier at Coessi, Kundal and Dokarpa. Next to the Tinai Ghât, the Diggi Ghât has most traffic, but there is a mere track leading to it. There are also two or three small roads opened up by the Local Funds.

5. From the above it will be seen that the communications in this part of the country are insufficient, the Local Funds are small, and are unable to provide even for the maintenance of existing small roads. Dharmshálas, &c., and for the provision of a good water-suply, which is much required in this district, I strongly recommend the improvement of the Diggi Ghât track, and the bridging of the main line through the Peta, whenever Provincial Funds can be obtained.

6. The cultivated area is small in Supa Peta, and is held by the Shenvi Brahmins and Mahrathas. The latter include some families of Desais, and also the Kumri cultivators who live near the Ghâts. Kumri cultivation has been much curtailed of late years, but it cannot be wholly done away with at present, without causing great hardship, and driving a large number of people from British into Goa territory. In communication with the Conservator, and with the aid of his department, the arrangements for allotting plots of lands for Kumri

have been much improved, and Colonel Peyton and I are sanguine that we shall soon be able to regulate this cultivation, in a manner satisfactory to Government, and sufficiently liberal to the people.

7. The principal crop cultivated in the villages now reported on is rice; sugarcane is sparsely raised, and the garden area, on which cocoanuts, arecanuts, &c., are grown, is very limited. The rice-crop is grown both during the monsoon and during the cold season; the harvest of the former is in November and December, and of the latter in May immediately before the monsoon. Last year a large portion of the latter crop was lost owing to the early rains, which commenced about the 20th May, a date which, as far as I can learn, was earlier than has been known for many years. But little of the rice land in this part of the country bears a second crop.

8. I entirely concur with the Survey Commissioner as to the rates of assessment proposed, and also regarding the grouping of the villages. As he states, it is impossible to make any accurate comparison in these villages between the past assessment and that now proposed. Hitherto one village has included any number of hamlets scattered at widely intervening distances all over the country, some portions of them being entirely isolated from the rest. The old accounts give the Warg number of the occupant in which may be included patches of land in different hamlets, and the exact assessment on each patch is unknown. In the absence of a survey, it was impossible to know the exact position of the whole of the land within a Warg, and held by one occupant. Most of the hamlets consist of one house with its adjoining buildings; in very rare cases does the name of the village indicate more than a certain area of country; the central spot being generally the site of the Gram Devasthán, or the chief temple of this portion of the country.

9. The rates proposed now being very moderate, if hereafter on the whole we find a considerable increase in the revenue collections, we must accept it as a sure proof that much of the cultivated area has hitherto been unassessed, or has borne a very light assessment. In the four villages named by the Survey Commissioner where the entire area is said to be now included in these proposals, the new assessment is higher than the old rates, but I concur with Colonel Anderson that it is quite possible that as the survey progresses, fresh plots of cultivated land may come to light in other hamlets, the old assessment of which is included in that now assigned to these village lands.

10. In conclusion, I have the honour to state my entire concurrence with the Survey Commissioner's proposals, and to recommend them for the early sanction of Government. I believe that the arrangements which I have made will enable us to introduce the settlement into these villages during the current month. Should other adjoining villages be then ready for settlement, I would ask that Government may allow its introduction at the same time in anticipation of sanction, as the rates will be similar, and their position and circumstances exactly correspond to those of the villages now under report. I agree with Colonel Anderson, that the smallest progress in the survey settlement in the Supa Taluka is better than none at all, and that considering the character of the country with which we are dealing, the slow progress made is fully accounted for, though we may hope that with an improvement in the climate, the future progress of the survey settlement may be somewhat accelerated.

11. I may add that the concessions under Government Resolution No 5573, dated 21st October 1874, will, so far as they are applicable, be brought into effect in the present settlement.

12. It may also be of interest to note that Mr Sawyer, the Chief Engineer in charge of the survey of the proposed line of railway from Marmagao on the coast in the Goa territory, to Hubli in the Dhárwar [illegible], informs me that he has found a good line for the railway over the Ghâts at a point between Tinai and Coossi, both which places are shown on the map accompanying the Survey Commissioner's report. The line will run for some distance very close to the main road leading to Dharwár.

13. To a certain extent, this line of railway will be of importance to the northern portion of the Supa Táluka. But to the rest of the Kánara District, it will be of no use; on the contrary it will draw away the traffic now passing through Kánara to the British ports of Kárwár and Kumpta, to the foreign port of Marmagao. I much regret that this new scheme seems to have superseded the line of railway to Kárwár, which was formerly much approved, and which would have been of infinite value to British territory.

I have, &c.,

(Signed) A. R. MACDONALD,
Collector.

No. 1004 of 1880.

REVENUE DEPARTMENT.

Nipáni, 17*th May* 1880.

received yesterday, and forwarded at once to Government for the issue of the necessary sanction.

ARTHUR CRAWFORD,
Commissioner, S. D.

Revenue Survey and Assessment.

No. 2910.

REVENUE DEPARTMENT.

Bombay Castle, 5th June 1880.

Memorandum from the Commissioner, S. D., No. 1094, dated 17th May 1880—Submitting correspondence noted in the margin, on the subject of the introduction of the survey settlement into 17 villages and hamlets of the Supa Mahálkari's Division of the Kánara District

Letter from the Collector of Kánara, No. 6 -20, dated 11th May 1880
Letter from the Survey and Settlement Commissioner, S. D., No 451, dated 8th May 1880.

RESOLUTION.—The present report from the Survey Commissioner contains proposals for the settlement of 17 villages of the Supa Mahálkari's Division in the Kánara Collectorate, in which 62 villages were settled under Government sanction conveyed in Government Resolution No. 1204 of 14th March 1872. The Collector reports that the rates then imposed have been found to be in all respects suitable.

2. The principal crop cultivated in the tract under report is rice. There is but a small area of garden land, amounting indeed only to 22 acres, while the land cultivated with dry-crops measures 401 acres. The rates proposed are as under :—

Group	No of Villages	Maximum Rice Rate			Maximum Dry crop Rate		
		Rs	a.	p.	Rs	a	p
1	1	4	8	0	0	12	0
2 . .	13	4	8	0	0	10	0
3 ...	3	4	0	0	0	8	0

The maximum rate on garden land is Rs. 8, which gives an average rate of Rs. 3-2-11. The rates proposed for rice and garden land are almost similar to those sanctioned in the Government Resolution quoted in the last paragraph ; while the maximum dry-crop rates in the first two groups are each two annas higher than those sanctioned for the corresponding groups in the 62 villages previously settled. The Collector fully approves both of the grouping of the villages and the rates imposed, and as the latter seem to Government just and moderate they are sanctioned for a period which should be stated by Colonel Anderson in a further report. It is desirable that the period of guarantee should expire at the same time as that granted in other villages of the same táluka. The sanction conveyed is subject to the concessions named in Government Resolution No 5573 of 21st October 1874.

3. The Survey Commissioner and Collector both point out that it is impossible to furnish any comparison between the revenue which will be realized under the new rates and that which has hitherto been collected over nominally the same tract. It is not yet known whether the whole area of the 17 villages now proposed for settlement has come under the survey measurement or not. The term village, as expressing a territorial unit, seems indeed to be misapplied in this part of the district. A village so called is said to consist of numerous detached portions of land situated often at great distances from each other, and Colonel Anderson remarks that "it is quite possible that as the survey progresses some miles off a plot of cultivation and a small hamlet in some secluded valley may be found which will be asserted" to belong to one of the villages now being settled. In the old accounts the assessment paid on each "Varg" or "Kháta" was all that was known, and whether the whole extent of each "Varg" belonging to the 17 villages now being settled has been included or not, cannot at present be known with any accuracy

4. His Excellency in Council quite concurs with the Collector that the "smallest progress in the survey settlement of the Supa Táluka is better than none at all," and the rates now proposed, together with any others that may be imposed in other villages ready for settlement in the same district before the end of the year, have therefore already been sanctioned by telegraph. Government are well aware that there are peculiar difficulties in the way of the survey in the Kánara Collectorate owing to the conformation of country and the unhealthiness of the climate; and the progress that has been made there this year is very creditable to the officers concerned.

JOHN NUGENT,
Acting Secretary to Government.

Sir,

RECD JAN 5 1880

With reference to Government Resolution No: 5952 of the 4th November 1879 and the previous correspondence, I have the honor to submit for the orders of Government a letter from the Collector of Kheda with its accompaniments (to be kindly returned) from which it will be seen that the District Judge of Ahmedabad has reversed the decision of the Assistt. Judge and has remanded the suit for trial on the merits.—

2. This is the result which I anticipated. I considered that the Assistt. Judge's decision on the preliminary point of law was erroneous. The decision of the District Judge

Rec'd 5/1/80 138

ision accordance with the opinions
expressed by Lt. Taylor and myself.
I do not recommend that any appeal
be made against that decision. It
will be sufficient if the suit, now
that it has been remanded, is properly
defended on the merits on the grounds
that have been already sanctioned.

I have the honor to be,
Sir,
Your most obedient Servant

Suit.

Letter from the Asst Secretary of State Affairs, Dt. 23rd Oct. 79 forwarding a petition of S. R. Das & Co. Dt. 20th Oct. 79 praying that a letter from the District Judge of Khairi (Ref. 2000 of 1879) be referred to the High Court for orders.

The petitioners state that the District Judge of Khairi has reversed the decision of the Asst Judge in the case of Shaji Mackerdhan remanded the suit for trial on the merits. & stating that he will not recommend any appeal against that decision. [illegible] being dissatisfied with the decision of the Asst Judge is precluded on the merits on the grounds which have been already mentioned.

No appeal should be preferred against the decision of the District Judge remanding the suit for trial on its merits by the Asst Judge. The defence of the suit in the Asst Judge's Court should be conducted on the grounds previously recommended.

Mr 7-1-80.

Territorial Sub-division

Kanara.

Division of the present Kumpta Taluka into the Talukás of Kumpta and Ankola.

Former Papers in Comp. No.		18
Subsequent	" No.	18

79.

1424

No 3397 of 1880.

From

A. R. Macdonald Esquire
Collector of Kanara

To

A. T. Crawford Esquire
Commissioner S.D.

Kanara Collector's Office
Karwar 28 September
1880.

Sir,

In reply to your No 2002, dated 28th ultimo I have the honor to forward two statements containing my proposals regarding the future administration of the villages at present included within the limits of the Coompta Taluka. There is now a Mamlutdar's Charge with a Sub-division (Ankola) under a Mahalkary.

2. The number of villages and

and the revenue under the old system were as follows:

	No of villages	Revenue for collection
Naulutdar's Do	120.	Rs 106,145.
Mahalkari's Sub. Division	44.	" 39,735.
	764.	

2. Since the introduction of the Revenue Survey settlement the number of villages and the revenue have become as follows.

	No of villages	Revenue Rs.
Naulutdar's Do	146	139,895.
Mahalkari's Sub. Division	72	75,033.

So that there is an increase in the number of villages (not area) and in the revenue for collection as follows.

	Increased no of villages	Increased Revenue
Naulutdar's Do	26.	Rs 33,750.
Mahalkari's Sub Division	28.	" 35298.

3. This large addition of

Land Revenue and of villages has necessitated the number of village officers being increased as follows owing to the large amount of extra work to be done by them.

Division.	Patels			Shanbogs			Total		
	No	Pay		No	Pay		No	Pay	
		Rs	a p		Rs	a p		Rs	a p
Old									
Mamlutdar's Division	89	1879	" "	27	2688	" "	116	4567	" "
Mahalkary's Division	51	775	" "	10	748	" "	61	1523	" "
Revised									
Mamlutdar's Divisn	93	3581	" "	43	5989	" "	136	9570	" "
Mahalkary's Division	57	1860	" "	20	2882	" "	77	4742	" "
Increase									
Mamlutdar's Division	4	1702	" "	16	3301	" "	20	5003	" "
Mahalkary's Divisn	6	1085	" "	10	2134	" "	16	3219	" "

The above includes all the increase lately submitted for sanction.

4. From this detailed account it will be evident how much the work to be done by the Mamlutdar has increased and that some changes are required to enable him to carry on his increased duties with

P.T.O.

an establishment appointed for lighter work. I propose to transfer 21 villages from the Manlutdar's charge to that of the Mahalkary, their revenue being of Rs 1854. I would also appoint another Manlutdar with an increased establishment and a Sub Treasury for the Ankola Sub division. This will relieve the Manlutdar of complaints of a portion of his charge and also of all matters connected with the Ankola Sub: Division. The present establishment in his Office will then be sufficient for the work, and no increase to it will be required. The Land revenue will not be very much decreased.

5

5 In Ankola I propose to abolish the Mahalkary and to place a 4th grade Mamlatdar there with a total Land revenue of Rs 93,544. Formerly the Land revenue of Ankola amounted to Rs 49,989, out of which the permanent remissions amounted to Rs 10,254. The work of the Peta could then be done by the present permanent establishment But the Land revenue has now grown to Rs 75,033, and adding Rs 18,511, the revenue of the 21 villages to be transferred from Coompta, will in future be Rs 93,544. So the work has grown and will increase much hereafter and the full establishment of a Mamlatdar's Peta is

is required. A few items are given in the margin.

Amount of work in Ankola Peta for 1879-80	
No of registered letters	
Inward	9598.
Outward	11966.
No of cases under act X of 1876.	3.
No of Criminal cases —	120.

6. These proposals are fully set forth in the accompanying statements and I think that the changes are required in order that the permanent establishments may be able to carry on the work and I hope therefore that they may be sanctioned. I am not prepared to make proposals for other talukas as yet, because the Revenue Survey is still in progress. When the settlement is complete in Sirsi and elsewhere some changes must be made and I will leave a note of what I think may

may be required. 93

I have the honor to be,
Sir
Your most obedient servant,

W. Macdonald
Collector of Kaira

Sirs,

C. Condeaux, Esquire
My Remembrancer of Legal Affairs.

&

N. A. Newcombe, Esquire
My Under-Secretary to Government
Revenue department.

Sirs, Poona 23rd November 1882.

In reply to your Memo: No. 6143 of the 20th Instant, I have the honor to inform you that in order to give effect to the proposals contained in the Memo: from the Commissioner S. D. No. 2444 of 7th October 1882 for the administration of certain villages (at present included within the limits of the Kumpta Taluka of the Kanara District, the alteration in the Talukas concerned) I mark, in my opinion, under Section 7 of the Land Revenue Code

1879, be "duly published" by notification in the Bombay Government Gazette.

2. This section provides that each Taluka shall consist of such number of villages as may from time to time be prescribed in a duly published order of the Governor in Council and the present Talukas (i.e. as they stood at the introduction of the Act) shall remain as they are until altered by the Governor in Council. Consequently any change affecting the number of villages in a Taluka must be "duly published".

3. So too, section 14 para: 2 provides that the Mahals existing at the time of the introduction of the Act shall remain as they are until altered by the Governor

in Council ~~that is to say, in the~~ manner described in section 7, ~~viz~~ namely, "each Taluka shall consist of such number of Mahals as may from time to time be prescribed in a duly published order &c".

4. As the proposals under consideration involve a change in the number of Talukas in the Kanara District the provision of the section applies, namely, "each district shall consist of such number of Talukas as may from time to time be prescribed in a duly published order &c.

5. Accordingly I beg respectfully to submit the accompanying draft for the approval of Government

Rec'd 23/11/10 00258

proclamations and notifications in
the Official Gazette: but consider
that in addition to this, the altera-
tions in the Zulukas, Mahal, and
village concerned should be made
locally known by proclamations,
notices and other means in addi-
tion, use.

I have the honor to
be
Your most obedient servant
[illegible]
Secretary of Legal
Affairs.

Notification

Revenue Department

Bombay Castle 4th January 1877

In exercise of the powers conferred by Section 7 of the Bombay Revenue Code, 1879 the Governor in Council is pleased to direct that from the 1st January 1877 the Mahal of Ambola which is at present a portion of the Kumpta Taluka in the Kánara district shall be abolished and that the villages included within the limits of that Mahál together with the 21 villages hereinbelow mentioned at present included within the limits of the Kumpta Taluka, shall form an additional Taluká in the said District to be known as the Ambola

Taluka which shall be under the charge of a Mamlatdar to be appointed by the Commissioner, S. D.

The Financial Department of the Secretariat.

No 4260 of 1880 183

From,

R. E Candy Esquire
Acting Collector of Kanara

To,

J. Nugent Esquire
Secretary to Government
Revenue Department
Bombay

Karwar 2 December 1880.

RECD
DEC 7
1880

Sir,

As directed in Government Resolution No 6265 dated 26th November 1880, I have the honor to submit for publication in the Government Gazette a draft Notification regarding the formation of the new Taluka of Ankola in this District as sanctioned in Government Resolution No 4020 dated 13th idem. A statement of villages

in

on the present Sub-division of Ankola and of 21 other villages in the Coumpta Taluka Division to be transferred to the new Ankola Taluka is subjoined at the foot of the Notification.

2. The 1st instalment of land revenue in this District falls due on the 15th December. I have therefore inserted the 15th December as the date from which the Taluka is to be constituted in order that the money to be collected as land revenue in the 21 villages of Coumpta Taluka which are to be transferred to Ankola may be paid into the Ankola Taluka Treasury and accounted for there

3. A notice has been issued to be posted up in each of the 21 villages indicating the change which has been effected and proclamations both in Coompta and Ankola will be made in a few days.

4. In order that the notification may be published at an early date to enable me to carry out the proposals noted above in para: 2, I have addressed Government direct and have also sent a copy of this report and of the notification to the Commissioner, C.D.

I have the honor to be,
Sir
Your most obedient servant
R. E. Candy.
